Try it ...
while we do
all the talking

Introduction

LearningLanguageBuddy (LLB) is an interactive language learning platform that combines three powerful tools:

- Smart flashcards for vocabulary building
- Daily quizzes for progress tracking
- AI-powered conversation practice for real-world language skills

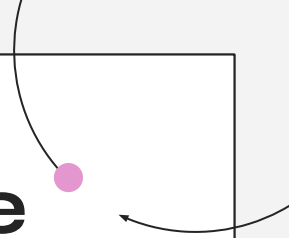

Comprehensive Skill Development

Incorporated learning tools like:

- **Vocabulary building:** Smart flashcards to help users build and retain new words efficiently.
- **Monitor progress:** Daily quizzes to track their improvement over time. Provides motivation and identifying areas for further study.
- **Personalized learning:** The AI-powered conversation practice to bridge the gap between theoretical learning and real-world communication.

Personalized Learning Experience

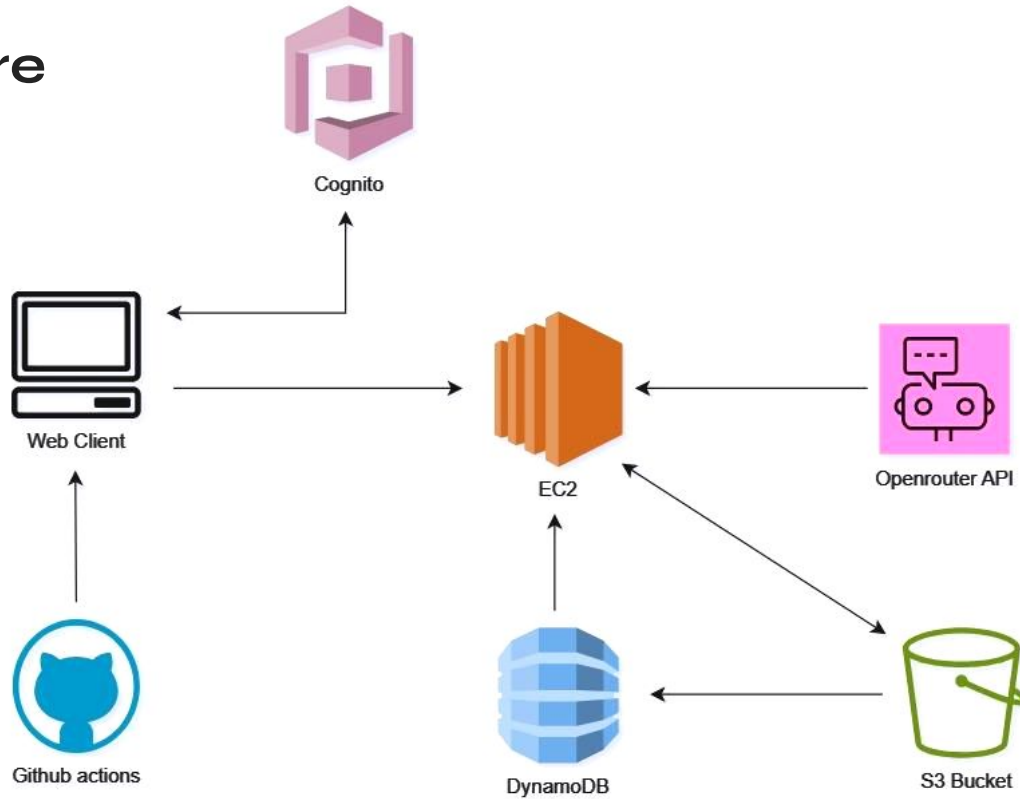

Tailoring learning journey for the user:

- Flashcards can be customized based on individual needs and progress.
- Quizzes can adapt to the user's performance, focusing on areas that require more attention.
- AI conversations can be adjusted to match the learner's proficiency level and interests.

Architecture Diagram

Tech Stack

- HTML/CSS
- JavaScript
- Python Flask
- AWS Cognito for authentication
- AWS EC2 for server hosting
- DynamoDB for database
- OpenRouter API for language conversation
- GitHub with GitHub Actions for CI/CD

Future Work

- Add multilingual chatbots
- Add voice bots for fluent enunciation
- Add “read aloud” feature for a more accessible website
- Check Web Accessibility for ADA Compliance: [AudioEye](#)

Q & A

**Happy to answer your
questions on our app!**

Thank you
